Fitting

We sell our leather jackets with back protectors, because so often we see ladies purchase a fitted jacket and then there is no room for a back protector.

If you going to use the jacket for summer, consider a smaller size, BUT if you going to use all year around with a long sleeve then select Regular fit on our Sizing Calculator.

Sometimes ladies even take the back protector out and drop a size.. NOT recommended! When fitting the jacket open the back zips, this will make it easier to close the front zip, when you get on the bike, close the back zips for a nice fitted jacket to ensure no gapping at the back and prevent a draft. I will recommend if you UK10/12, then choose a Medium size jacket.

Measurement Instructions

Chest

Measure around the chest from under the arm around the fullest point of the chest

Waist

Keeping the measuring tape parallel to the ground, measure around your waist at the narrowest point of your torso. Make sure to keep one finger in between the tape and your body
